SE509

Installation, Maintenance and Operating Instructions

DESCRIPTION

Portable Personal Face & Body Wash Unit. Non-Aerated spray head is supplied by a full flow valve, activated by a squeeze handle.

FACE/BODY WASH	
Face/Body Wash:	Non-Aerated Spray head
Tank:	9 Litre, Stainless Steel
Activator:	Chrome Plated Brass Squeeze Handle

FLOW DATA	
Face/Body Wash	
Flow Pressure:	138 KPa
Flow Rate:	3 LPM

INSTALLATION

The unit is completely assembled prior to shipping. As unit is fully portable no installation is required.

MAINTENANCE

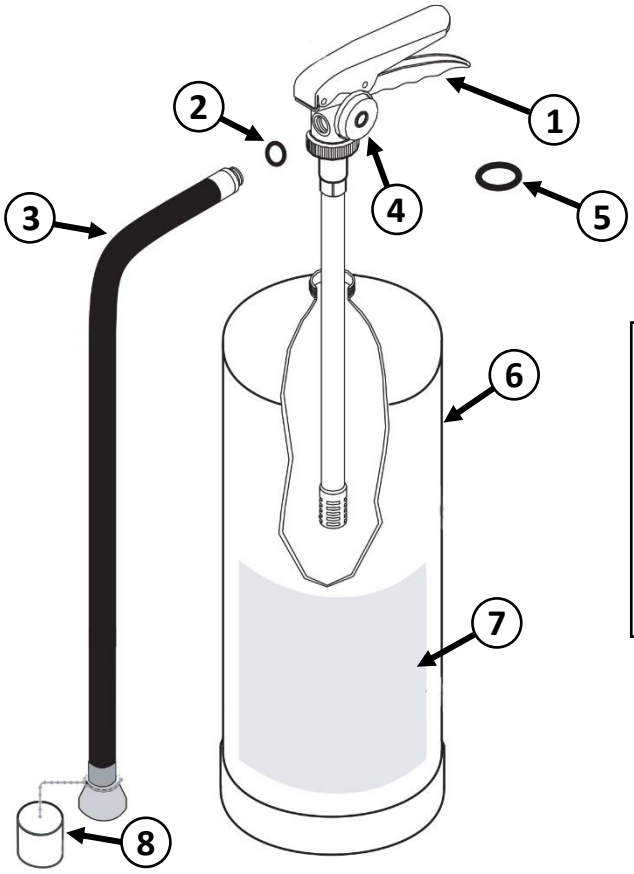
Inspect pressure gauge every week to ensure fully charged to 690 KPA working pressure. Clean and replace water every two weeks using only clean fresh potable water. SE4210: Water preservative can be added to extend the water life as per bottle instructions. (Available separately)

OPERATION

Remove ring pin. Press and hold discharge handle to operate.

RECHARGING

Ensure the cylinder is fully depressurized before removing head assembly. Rinse all parts with clean water. Rinse inside of cylinder. Refill with 9 Litres of clean, potable water. Inspect collar O-Ring for wear / damage and replace if necessary. Replace head assembly and hand tighten.
CAUTION: Over tightening with wrench may cause damage to valve.
To recharge air, use a regulated pressuring source with a calibrated regulator gauge. The regulator gauge should be used to determine when the correct charging pressure has been reached. Do not use the cylinder gauge for this purpose. Pressurize with clean air to 690 Kpa.



SPARE PARTS LIST

No:	Description:	Part No:
1.	Complete Head Assembly	SR 66032
2.	Hose O-Ring	SR 63011
3.	Complete Hose Assembly	SA 05004
4.	SE509 Pressure Gauge	SR 66033
5.	Head Assembly O-Ring	SR 63012
6.	Stainless Steel Cylinder	SR 66031
7.	SE509 Label	SR 69004
8.	Dust Cap Assembly	SA 05005

MAINTENANCE SCHEDULE

Weekly
- Inspect gauge to ensure fully charged (690 Kpa)
- Replace water every two weeks (If using water preservative refer to bottle instructions)

WARNING: Use only genuine Speakman parts when replacing or repairing components.
