ERGONOMIC HANDLING SOLUTIONS

THE STS™ DRUM HANDLING SYSTEM

The STS ergonomic drum handling system offers new concepts and solutions to age old problems yet still fulfilling the three STS objectives.

SAFETY - EFFICIENCY - VERSATILITY

Safety of the operator is the most important issue for any company so they can meet the requirements of their duty of care.

Speed of operation is of great importance for keeping up with the efficiency of a modern production process.

Equipment that can only handle certain types of drums is useless in today's ever changing workplace. This is why STS products will work on all types of drums.

DTC01 - DRUM TROLLEY

Ergonomic Design

An ergonomic drum trolley that is designed to protect the operator. Its totally unique Patented operation ensures that input loads are kept below 20kg even when lifting 300kg.

DTC01-TECHNICAL SPECIFICATIONS

<i>Max SWL</i>	300 Kg
<i>Max Input Force</i>	20 Kg
<i>Ground Clearance</i>	75 mm
<i>Drum Sizes</i>	50-230 Ltr
<i>Width</i>	795 mm

Use with any Drum

Operator Safety

DTP04 - SIDE SHIFT DE-PALLETISER

DTP04-TECHNICAL SPECIFICATIONS

<i>Max SWL</i>	<i>350 Kg</i>
<i>Overall Height</i>	<i>1320 mm</i>
<i>Pallet Height Accom</i>	<i>150/300 mm</i>
<i>Overall Length</i>	<i>950 mm</i>
<i>Overall Width</i>	<i>1620 mm</i>
<i>Max Lift Height</i>	<i>575 mm</i>

Patent Pending

The Side Shift De-Palletiser's unique versatility means no more moving of drums by hand. It is the only unit in the world that can handle drums on and off pallets or bunds from any position.

Safe

The operator only requires 12kg of force on the handle to lift 300kg.

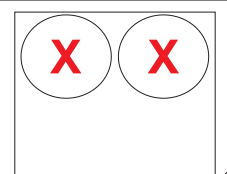

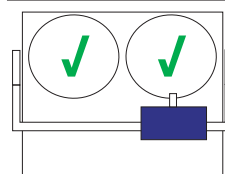

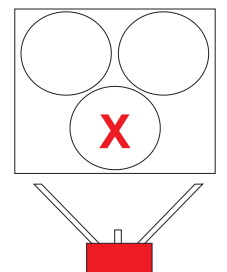

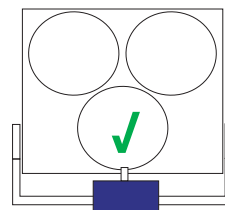

Efficient

Two speed hydraulics ensures de-palletising is done quickly.

Versatile

Access is from the front so all pallets and bunds can be stored against a wall.

SIDE SHIFT vs CORNER

SIDE SHIFT 3 **CORNER 0**

DRU01 - UNIVERSAL DRUM ROTATOR

The Universal Drum Rotator's unique adjustment system allows any drum to be lifted and rotated. It is also fitted with a failsafe clamping device that prevents any drum from slipping out of the unit.

DRU01-TECHNICAL SPECIFICATIONS

<i>Max SWL</i>	<i>350 Kg</i>
<i>Width</i>	<i>950 mm</i>
<i>Drum Capacity</i>	<i>50-230 Litres</i>
<i>Drum Diameter</i>	<i>350-600 mm</i>

STE01 - STACKER

STS build a range of Stackers, primarily for use with the DRU01 Drum Rotator. They are built in a choice of lift heights and leg widths to the customer's specification.

There are three choices of power option to suit the application required.

STE01 - BATTERY ELECTRIC / HYDRAULIC

STP01 - PNEUMATIC / HYDRAULIC

STM01 - MANUAL HYDRAULIC
