### PBA Safety Code – 28676

4 Drum DrumShed™

Complies with NFPA 30, OSHA, EPA & SPCC

299 Litre Maximum Capacity

2268 Kg Load Bearing Capacity

Replacement Grates Available.

Product Code: 28259

Optional Pallet Ramp Available:

Product Code: 28679

PBA Safety Drum Sheds feature a weather resistant, robust design made of eco-friendly 50% recycled polyethylene. Convenient roll top doors allow access from front or rear. Wide door opening of 1320mm accepts palletised loads.

The leak proof pallet sump keeps accidental spills under control, resisting unwanted chemical exposure from hazardous acids, caustics, and solvents.

All drum sheds feature seamless, robust construction that eliminates leaks and include removable self-locating grates that lift off for quick clean up. At 64 mm thick, the UV-protected polyethylene offers superior crack resistance and can withstand the harshest chemicals. Choose from 2 Drum, 4 Drum or IBC configurations, all of which are NFPA 30, OSHA, EPA, SPCC, and fire code compliant.

Drum sheds are the safest and most efficient way to store drums inside or outside, any time of year. A spacious interior offers ample headroom for adding funnels or pumps. Safety features include grounding capability, integral anchor bolt locations for wind resistance, and moulded in lugs which accept padlocks for security. Forklift pockets front and back make it easy to relocate empty sheds.

Our range of Spill Pallets are stocked nationwide and available for fast delivery.

Shipping available fully assembled or flat packed to save on freight costs.
