

# 28625

## 2 Drum In-Line EcoPolyBlend™ Spill Control Pallet w/Drain

### PBA Safety Code – 28625

2 Drum In-Line Spill Control Pallet

Complies with NFPA 30, OSHA, EPA & SPCC

250 Litre Maximum Capacity

1134 Kg Load Bearing Capacity

Replacement Grates Available.

Product Code: 28259

PBA Safety Spill Control Pallets keep accidental spills under control, resisting unwanted chemical exposure from hazardous acids, caustics, and solvents.

Made from 100% recycled polyethylene and designed with oversized sumps able to hold the contents of stored drums in the event of a leak or rupture—meeting or exceeding the most stringent spill containment regulations.

All spill containment pallets feature seamless, robust construction that eliminates leaks and include removable self-locating grates that lift off for quick clean up. At 64 mm thick, the UV-protected polyethylene offers superior crack resistance and can withstand the harshest chemicals. Choose from square or in-line configurations, both of which are NFPA 30, OSHA, EPA, SPCC, and fire code compliant.

Spill control pallets are the safest and most efficient way to store drums inside or outside, any time of year. They are also easy to utilize, with forklift pockets for easy relocation and a square design that is ideal when space is limited.

Our range of Spill Pallets are stocked nationwide and available for fast delivery.
