

# 28674

## IBC EcoPolyBlend™ Indoor Spill Pallet

### PBA Safety Code – 28674

IBC Indoor Spill Pallet

Complies with NFPA 30, OSHA, EPA & SPCC

1408 Litre Maximum Capacity

4082 Kg Load Bearing Capacity

PBA Safety IBC Spill Pallets keep accidental spills under control, resisting unwanted chemical exposure from hazardous acids, caustics, and solvents.

Made from 40% recycled polyethylene and designed with oversized sumps able to hold the contents of stored IBC in the event of a leak or rupture—meeting or exceeding the most stringent spill containment regulations.

All IBC spill pallets feature seamless, robust construction that eliminates leaks and include removable sturdy support pillars that lift out for cleanup. At 64 mm thick, the UV-protected polyethylene offers superior crack resistance and can withstand the harshest chemicals. They are NFPA 30, OSHA, EPA, SPCC, and fire code compliant.

Spill control pallets are the safest and most efficient way to store drums and IBCs inside or outside, any time of year. They are also easy to utilize, with forklift pockets for easy relocation and a square design that is ideal when space is limited.

Our range of Spill Pallets are stocked nationwide and available for fast delivery.
